

Acronis True Image 11

AUTO-BACKUP

Parker Monroe

Here is how to set Acronis True Image Home 11.0 to automatically validate an image backup immediately after the program has created the image.

1. Open Acronis True Image, by double-clicking on the icon I left on your Desktop.
2. Click on Tools on the menu line.
3. Click on Options.
4. Click on the plus (+) sign next to Default Backup Options.
5. Click on Additional settings.
6. Make sure there is a checkmark in “Validate backup archive upon its creation creation.” If not, left-click in the small box.
7. Click on OK, and exit the program.
8. From now on, every time you perform a backup of your PC, the backup image (archive) will be checked automatically.
