PhraseExpress is a must-have program that aids by correcting spelling, expanding phrases, and doing math calculations while you type.

What I like most about PhraseExpress is that whatever I add to it can be used in word processors (MS Word, WordPerfect, WordPad, etc.), email programs (Outlook Express, Windows Mail, Windows Live Mail, Juno, etc.), and chat programs (Facebook, Windows Live Messenger, etc.).

Examples:

- ★ cellphone becomes cell phone
- ★ \cc becomes CruiseCritic.
- ★ \dde becomes Darry D Eggleston
- ★ doucments becomes documents
- ★ aemil becomes email
- ★ \ok becomes “Either left-click on the “OK” button or touch the Enter key on your keyboard.”
